

TEAM
CLEVER AND VERSATILE
TABLE SYSTEM

What makes TEAM so different from other table collections?

The guiding principle of this table system is that it supports different methods of use. Holding a meeting, getting together, getting some work done: you can do it all with TEAM. Mix and match the various components into the table that suits the situation of each room.

INTRODUCTION

Organisations are subject to constant change; this calls for a certain dynamism within your office and work environment. There is a need for alternating work methods, either individually or together. The number of employees may vary, and companies want to conduct business in a more sustainable way.

Are you searching for a certain dynamism within your work environment? Allowing you to get on the train that transports all kinds of developments? In that case, TEAM will be the perfect solution for you.

It is due to the modular foundation of TEAM that its shape, appearance, function and accompanying accessories are easily adapted to suit your particular needs; both now and in the future.

HOW YOU CAN BENEFIT FROM TEAM

- **Design your own:** many options to give your interior the look that suits your organisation best.
- **Future proof:** this table system is easy to adapt to your future needs, while being environmentally friendly at the same time. Gispen will take back any components you no longer need, adopting a circular work method together.
- **Optimal use:** the clever modular system allows you to design the table that will suit your application best.
- **Healthy working:** alternating between a standing and sitting posture will improve your employees' health at work.
- **Circular entrepreneurship:** with this product you will join Gispen in contributing to the Circular Economy. TEAM has been designed to allow for easy future returns and reuse of materials.
- **Clever workstation:** well-thought-through cable management will ensure a safe and tidy workplace.
- **Adaptable on site:** the tables can be adapted at any time and on site, saving you transportation costs and disruption of your work process.

Croonwolt&eros Rotterdam

CLEVER, SUSTAINABLE AND MODULAR
IN SHORT: FUTURE PROOF

Conferring effectively

Holding a purposeful meeting means: tackling a project or challenge in an effective and pleasant way in order to realise the most within the available time. If you have the right furniture to support such a meeting, you will not only create a positive work atmosphere, you will save time as well!

How does TEAM contribute to this?

A barrel-shaped tabletop will ensure a good line of sight for all the participants of the meeting. Additionally, the sleek table legs allow for more chairs to be placed around the table.

The power and data sockets are installed in the most ideal positions, making sure that all devices are kept online and thus preventing any unnecessary interruptions from occurring.

Also important for an optimal conference room: the right lighting and professional cable management. We will be happy to provide you with tailored advice.

HOLDING MEETINGS
IN THE MOST **EFFECTIVE WAY**

**SITTING HIGH UP OR STANDING IS
PERFECT FOR A SCRUM SESSION**

Start the day productively

Scrumming is producing great results in many places. One of the conditions when it comes to an effective Scrum session: ensure that people can stay focused and provide structure. A centre table which stimulates an active work posture will contribute to this.

The TEAM scrum table can be equipped with high legs, leaving it to the participants to decide whether they want to scrum while standing or sitting down (on a Triennial Work High chair, for example). In the latter case, the height and position of the table will ensure a more active posture.

By incorporating power and data sockets into the tabletop, laptops or tablets can be charged at any time.

In need of a monitor? You can easily attach one to the table. TEAM's clever system makes sure that all the wires and cables are neatly tucked away.

Working from any location

Checking your email real quick while in between appointments, and doing so without your own fixed work base? Many organisations offer so-called agile workstations to their employees, which do need to be equipped with the right functionalities. A large tabletop, for example, as well as good acoustics and some privacy. And a good chair that is easy to set to the correct height and pleasant lighting.

Create a welcoming ambience by installing a sturdy TEAM communal table with wooden legs, equipped with a power supply for laptops and plenty of room for all those who have selected this table as their workstation for the day.

FOLD OPEN YOU LAPTOP AND GET TO WORK, **IT'S AS SIMPLE AS THAT**

The atmosphere of a pub

Drinking a cup of coffee with a colleague. Having an informal conversation with a client. Whether it concerns a reception area in an office- or in a care environment, TEAM will always adapt to its surroundings.

Mix and match the table legs, tops, and accessories to come up with the ideal setup for pleasant encounters. Working or deliberating in a cosy setting with a relaxing atmosphere is often quite satisfactory!

Make people feel more at home with a wooden tabletop equipped with a soft top layer, rounded edges and brightly coloured table legs. The appealing look of this piece of furniture invites you to pull up to the table.

COLLABORATING IN A
RELAXING ATMOSPHERE

Spending time while waiting does not have to be lost time

Create an area where waiting becomes pleasant, even when the person sitting there is nervous for their appointment. The different setups that TEAM has to offer allows you to create your ideal waiting area. You can select your own colours, materials and shapes.

Create a comforting setting by opting for natural colours and materials, for example. Round shapes will make your design look friendly and inviting.

If you are waiting for an appointment, checking your email or reading a magazine will help to pass the time. Allow your visitors to be themselves while waiting; some like a little privacy, others find it pleasant to have a chat with someone.

**CHECK YOUR EMAIL OR SIT BACK
AND READ A MAGAZINE**

There is no accounting for taste
What is considered to be comfortable or classy differs from one person to another. We know that there is no accounting for taste, which is why the TEAM table collection offers a wide range of shapes, colours and materials. Mix and match your favourite table to create the perfect setup for you.

Universal system

Due to its versatile and modular system, TEAM will meet all your wishes of today and those of the future.

TEAM comes in the form of your current preferences, but the table system is fully adaptable to any new requirements in function or appearance. Even after years of use at the office; a transformation that takes place on site. This is possible due to the modular connections of TEAM; all the components are assembled via a screw-, magnet- or click connection. No special tools are needed for (dis)assembly.

Think of a conference table you would like to convert into a reading table, or the other way round. The transformation can also imply a transition to a different work method; from working individually to working together, or from focussing to deliberating.

A differently shaped table leg, a new top, additional accessories that add function – it can all be arranged in no time at all. Therefore, it will come as no surprise that the programme is very suitable for an agile work method, such as Scrum.

ENDLESS POSSIBILITIES FROM A UNIVERSAL FRAME

LEG POSITIONS

The appearance of the table is easily changed by rotating the position of the legs.

A seated or standing meeting?

Some prefer to stand while holding a meeting, others would rather sit.

Even better: alternate between the two postures! This is good for your health and prevents health problems from arising.

TEAM stimulates this alternation.

ALTERNATING POSTURES IS HEALTHY
AND PREVENTS HEALTH PROBLEMS FROM ARISING

Flybye

A collaboration between Hollands Licht and Ernst Koning has resulted in a new table lamp: Flybye. The fixture has a clever design which exudes ambiance, functionality and beauty. Flybye transforms any conference table, such as Gispen TEAM, into a functional reading table in the blink of an eye.

The Flybye table model is available with a tabletop mount (T2) or base (T1). The perforated lamp cover provides indirect light that is evenly distributed.

Kelvin

Flybye and Ring are available in 2700K and 3000K variants. We recommend 2700K for waiting areas, restaurants and reception areas, and 3000K for more work-related applications.

Where 2700K gives warm and cosy light, 3000K gives a more functional and bright light.

Ring

This table lamp has a special bond with Gispen; the shade is actually the same component as the tray of the Gispen ASY side table. Ernst Koning has 'reused' the item; the side table and lamp are made from the same mould.

The Ring table lamp is available with a tabletop mount (T1). The light radiated by Ring is incredibly pleasant because the integrated LED lighting provides indirect light that is evenly distributed.

Holland Licht

The collection of Holland Licht consists of timeless designer lighting. Pure Dutch Design which is characterised by the use of special materials and a contrasting interplay of light and shadow.

The collection is in line with the philosophy and design quality of Gispen. All the components of Ring & Flybye are manufactured in the Netherlands.

The assembly is carried out by people who have a disadvantage on the labour market.

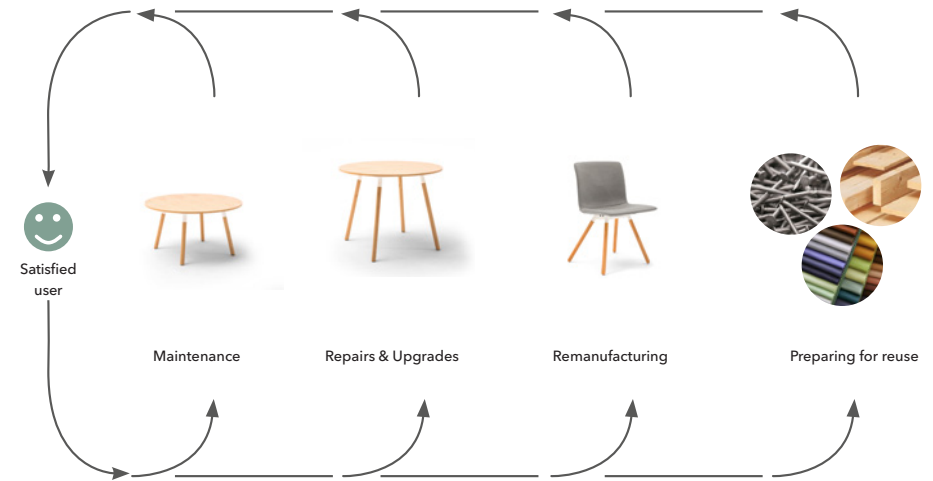

Returns and reuse

We have already taken account of future returns and reuse of components and materials in the design of TEAM. Gispen stands for high-quality products and we remain responsible for those products throughout their lifecycles, while reducing waste production where possible. Therefore, we will take back your TEAM product when it has reached the end of its lifecycle, after which we will repurpose it or refurbish it to brand-new.

Circular services

Gispen offers the following optional services in order for you to make optimal use of your TEAM table:

- TEAM is installed by skilled Gispen fitters, allowing you to get to work right away.
- Preventive maintenance will ensure that your workspace is always at its highest utility.
- Would you like to change the function, colour or material of your TEAM product? Gispen will take care of the upgrade for you, right there on site.
- Has your TEAM table become redundant? You can return it and we will give it a new lease of life via our REVIVED by Gispen concept, for example.

Gispen has opted for innovative design and manufacturing and efficient use of furniture. You will gain the following if you join us in our endeavour:

FOR YOUR COMPANY

- Value retaining furniture
- Furniture that can be adapted (on site) to meet new requirements
- The option to pay per use
- Experience that 'new' feel, even when it concerns refurbished items
- Contribute to the reduction of eco-tax

FOR YOUR SURROUNDINGS

- Eliminate raw material wastage
- Less eco-tax
- An increase of local employment opportunities

WE GUARANTEE THAT OUR **PRODUCTS AND MATERIALS RETAIN THEIR VALUE.**
WE **PREVENT WASTE PRODUCTION** AND
YOU **REDUCE COSTS**

Cable management

A conference table without the digital means to give a presentation or charge your laptop is unthinkable in the office environment of today. Well-sorted cable management guarantees a safe and tidy conference room. This is why TEAM offers a wide range of cable routing options.

If there is need for a higher capacity, TEAM will adapt and facilitate that change. TEAM can be adapted to fulfil any requirement in a few simple steps:

1. The power supply differs per organisation. TEAM offers a suitable solution for any type of power supply.
2. Power supply is provided by a single cord which is routed through a

spacious cable duct. Straightforward and efficient, due to cleverly placed openings for access. And the flexible cable tubing ensures that cords and cables stay neatly tucked away.

3. We offer cable ducts in different sizes to accommodate different quantities of cables and power sockets.
4. There are different options for how you wish to have the power and data supply arranged from the tabletop.
5. The cleverly designed magnetic cable holder allows you to install the flexible cable tube anywhere onto the frame.

1. tailored cable management

2. cable tray

3. medium & large cable duct

4. various power and data solutions

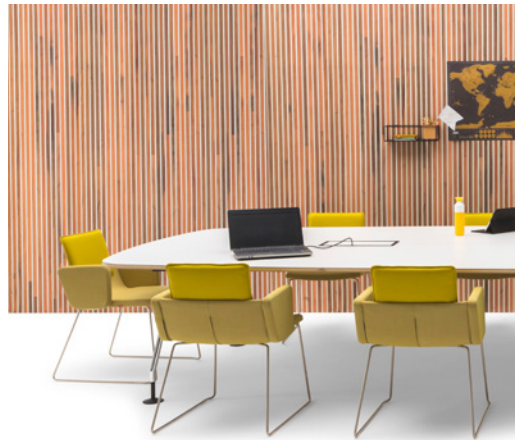

5. flexible cable tube & magnet connection

OFFICE TRENDS

Most organisations change their interior every eight years or so.

After all, colours and designs are sensitive to trends. Does this sound familiar to you? In that case it will be good to know that with TEAM – and all its variations – you are set for the foreseeable future.

EFFICIENT MEETINGS

Standing meetings are more efficient than seated meetings because people are more active. The increase in efficiency shortens meetings with 35% which is very beneficial!

PUT IT DOWN TO EXPERIENCE

Gispen has been actively involved in the field of sustainability for many years. In 1977, Gispen designed the ST furniture line, or 'SchakelTafel' (link table). Removable table legs and tops offered unlimited configurations. A kind of Lego for facility managers.

YOU HAVE A DELIVERY!

The modular system makes it possible to transport TEAM in a flatly-packed way. This not only saves costs, but also reduces CO2 emissions due to efficient transport.

PETER DE BOER

Peter de Boer (1952) studied Mechanical Engineering and Industrial Design at the Rietveld Academy. He worked as a freelance designer for a short while before he became affiliated with Gispen, where he has been working as a product designer since the 1980s.

CLEVER FURNITURE CONCEPTS
ARE DEVELOPED **FOR THE OFFICE OF
TODAY AND THAT OF THE FUTURE.**
THIS ALSO HOLDS TRUE FOR TEAM.

What do you stand for as a designer?

I consider quality and sustainability to be of vital importance. My philosophy is not about tempting clients with a continuous stream of new products. I believe that clients will continue to come back when your products have proven to withstand the test of time, retaining their quality and value. Gispen celebrates its 100th anniversary this year. This incredible accomplishment was achieved because we offer lasting quality, which I am proud to be a part of as a designer.

What does the Gispen brand mean to you?

When I think of the Gispen brand, I think of continuity, quality and sustainability.

What is the idea behind TEAM?

Clever furniture concepts are developed for the office of today and that of the future. This also holds true for the frame of TEAM. You can expand or change

this universal, maintenance-free frame whenever you desire.

What does your typical day look like?

As a designer, you spend a lot of time thinking about your next design. In fact, a lot of the thinking has already been done before anything gets drafted.

In Culemborg, I am in close contact with the factory workers who are manufacturing my designs as well as my colleagues from the Sales department. I'm also on the road quite a lot, travelling to business meetings with (potential) clients and valuable design partners, which I really enjoy doing. I'm practically the company's historian because of my long service record here. I know all about the products we have created in the past, the materials we use today and the various possibilities we have on offer. It feels great to be a conversation partner who can add true value.

A WORD OF ADVICE FROM THE DESIGNER

'Listen to the people around you but follow your own path.'

OPT FOR THE TABLE LEGS THAT SUIT YOUR WORK METHOD

Sitting, standing or alternating between the two. TEAM supports the work method you choose. The different table legs allow you to easily design the perfect table for you.

THE RIGHT NUMBER OF PEOPLE AT THE TABLE

Do you know the difference between a meeting and a deliberation? They are different activities, with a different number of seats at or round the table. The participants of a formal meeting often bring documents, either in paper or digital form. This means that the table is used more extensively and that there is more space required per person. We reserve 70 cm per person for such meetings.

A meeting often takes longer than a deliberation, and the participants often need more room while sitting at the table, allowing them to change postures

every now and again. Especially when a presenter is using a monitor. A rollable and swivelling conference chair is ideal for this situation.

When deliberating, participants often take up more space around the table. They place their coffee mugs on the table and perhaps their phones and folders as well in order not to have to hold them. In short, with a deliberation there may be more people sitting around the same table as when holding a meeting.

*The possibilities are endless.
From 80 to 200 cm wide
and 100 to 380 long.*
