

SDK BEYOND
STORAGE

PRODUCT DESCRIPTION

Remarkable sliding door cabinet

The SDK sliding door cabinet is ideal for functional storage and archiving in open spaces, adding character to the room at the same time. The cabinet opens and closes without making a single sound, keeping interference to a minimum.

SDK adds a decorative touch to any room due to its friendly-looking perforation patterns and the acoustic material on the inside of the doors. The cabinet can also function as an office dividing wall or pinboard; the optional planters or acoustic PET felt panels are easily added. SDK is all about circularity and sustainability. The cabinet has a modular structure, can be used for many different functions and will last for years because of its timeless design.

SDK THE SILENT
ACOUSTIC SLIDING DOOR CABINET

Mobilis, Apeldoorn

SDK in short

- Opt for smooth or perforated doors (round or square pattern)
- Equipped with a lock (master key can be ordered separately)
- The cabinets can be adjusted from the inside
- Sleek, robust and silent sliding doors
- Sleek architectural design due to the top being given the same powder-coated finish
- Perforated doors with recycled acoustic material

The basis

SDK comes in many different sizes, ensuring that the cabinet will always match the rest of your furniture:

- The cabinets consist of two separate frames, which will be fitted together to form one unit prior to delivery
- Widths: 160, 180, 200 and 240 cm
- Heights: 83, 118, 160 and 195 cm

SDK FUNCTIONAL AND CHARACTERISTIC STORAGE

PRODUCT DESCRIPTION

SDK PET felt panels

Would you like to improve the acoustics and ambience of your interior? Then you might consider fitting a PET felt panel to the back of your SDK. Added benefit: the panels can also be used as pinboards. The panels are fitted via magnetic strips to allow for easy removal and are available in a wide range of colours.

SDK plant troughs

Would you like to add some green to the office? Stainless powder-coated planters are easily fitted on top of the cabinets. The troughs also function as a visual partition of the office. Good news: it has been proven that green in the work environment adds to the well-being of employees. The planters come in different dimensions.

Dimensions (LxWxH)

120x47x20 cm
160x47x20 cm
180x47x20 cm
200x47x20 cm

SDK recycled acoustic material

The inside of the perforated doors of the SDK is equipped with acoustic material. This improves the acoustic comfort in the office and thus the productivity of employees.

The acoustic material used for the SDK contributes to sustainability goals. It consists of 77% recycled textile waste from the clothing and interior design industry. Also, it can be reused in the Gispén REVIVED Collection at the end of its life cycle. The technical lifespan of the material is up to 75 years; so it can last several life cycles. We also separate the cutting waste in the factory so that it is suitable for the supplier's recycling program.

More advantages of recycled acoustic material:

- up to 50% less CO₂ emissions per kilogram compared to acoustic material without recycled content*
- the acoustic material is not glued but clamped in the door for easy recycling
- Environmental Product Declaration (EPD) available
- meets the VOC emission requirements (Ansi Bifma M7.6.2)
- acoustic absorption value: ISO: 354:2003 - class C 20 mm thick, class A 45 mm thick
- Restricted Substances List (RSL) statement
- Substances of Very High Concern (SVHC) statement

*based on our LCA calculation in which the material is compared with material without recycled content in the same application

PRODUCT OPTIONS

SDK accessories

Organised storage is made even easier with the many accessories that SDK has to offer:

- Shelves
- Pull-out frames
- Pull-out drawer
- Leaflet shelf
- Anti-tilt mechanism
- Cover instead of steel top
