

# GISPEN SDK

## PRODUCT SUSTAINABILITY SHEET

This configuration consists of a sliding door cabinet with metal body, doors and top shelf. In addition, the cabinet is equipped with recycled acoustic material. All materials are approved and safe to use. Materials are designed to be reused or recycled safely at the end of product lifetime.

### Sustainability facts

- All parts in this product can be upgraded or replaced easily to meet future needs
- Product disassembly is easy with standardized tools
- Polyester powdercoating is free from hazardous red substances

| MATERIAL                | WEIGHT (GR) | % OF TOTAL |
|-------------------------|-------------|------------|
| Steel                   | 81.323      | 88,13%     |
| Polyester powdercoating | 8.500       | 9,21%      |
| Aluminium               | 1.104       | 1,20%      |
| Metisse                 | 1.080       | 1,17%      |
| Polyamid 6              | 163         | 0,18%      |
| Zamak                   | 106         | 0,11%      |
| Total                   | 92.276      | 100%       |

### Lifetime extension, reuse and recycling

We are committed to keeping the environmental footprint of our products as low as possible, so we advise you to contact us when the product is broken or no longer being used. With our Circular Hub, we make sure that the useful life of products is as long as possible.

- Lifetime extension by repair, maintenance or refurbishment
- Taking back for reuse
- Reusing parts and/or materials
- Recycling

### Production and packaging

This product was produced in Belgium and has been packaged using reusable and recyclable packaging materials. The product was designed to be easily disassembled.

### SPECIFICATIONS

Weight: **92,28 KG**

**28,65% recycled materials**  
in this product

**90,79% recyclability**  
of this product

**0% rapidly**  
**renewable materials**
